

Environmental and Social Screening Report

August: 2020

Project ID: P154990

Construction of 2-Room Block & Allied Infrastructure at Govt. Middle School, THICHKA, District, Rajouri.

(Jhelum Tawi Flood Recovery Project)

Prepared by: PIU PWD(R&B) Jammu: Government of Jammu and Kashmir for World Bank.

ENVIRONMENTAL AND SOCIAL SCREENING REPORT

EXECUTIVE SUMMARY

1. The devastating deluge of September 2014 had enormous negative impact on socio-economic aspects of the Union Territory of J&K (erstwhile state) and massive infrastructure damages in which not only the major town but far flung area were also affected. In response to this tragedy, a mission of the World Bank visited the Union Territory of J&K during February 1-6, 2015 in order to produce a rapid multi-sectoral assessment report of the damages and needs. The RDNA estimates the total damages and loss caused by floods at about INR 211,975 million (US\$ 3,550.45), most of it to housing, livelihoods, and roads and bridges, which combined represented more than 70% of the damages in terms of value. Public service infrastructure and equipment of hospitals and education centers were also severely damaged and are still not fully operational.
 2. Based on the RDNA results, restoration works underway, and discussions with the GoJ&K, "Jhelum and Tawi Flood Disaster Recovery Project (JTFRP)" will focus on restoring critical infrastructure using international best practice on resilient infrastructure. One of the sectors badly hit during the floods was School Education Infrastructures. The restoration/reconstruction of these damaged schools has been included in Component-1 of the World Bank investment plan of INR 5043.75 Lacs under JTFRP. The Govt. Middle School, Thichka, located 16 kms North-West of Sunderbani town, has been identified among such 74 nos. schools in Jammu division severely affected by torrential rains in September 2004. The school complex was inundated as result of torrential rains in the sub-region during the incessant rains in September, 2014, causing suspension of the school activity in that period.
 3. Subprojects under "Jhelum and Tawi Flood Recovery Project" have a prior requirement of screening which is based on three categories; viz., nature of the project, size of the project and location of the project that is sensitive area criteria. The objective of Environment and social screening is to identify the potentially significant environmental/social issues of the sub-project at an early stage for detailed Environmental and Social impact studies. Public consultation was conducted at the project location on 8th August, 2018 and thereafter on 21.08.20 with Gram Panchayat and local people as part of environment and social screening study. People have expressed keen interest in the proposed subproject during the Public consultation. People in general were very enthusiastic about the benefits of the subproject. The Views, Suggestions and specific needs of School as expressed by teachers and citizens of the area during public interactions have been considered in framing the proposals for reconstruction of school building.
 4. The screening study reveals that there are no likely significant adverse social and Environmental impacts.
-

1. Introduction

1.1 Project Background

1. The Jammu & Kashmir region owing to its geographical and geo-climatic setting is a multi-hazard prone region that has experienced natural disasters like earthquakes, floods, landslides, avalanches, high velocity winds, and snowstorms. Floods and flash floods are a frequent feature owing to topographical characteristics of the region. Floods generally occur between late June to September when the major rivers are already swollen with melting snow and followed by heavy rains. Flooding of the rivers Jhelum and Tawi and their tributaries is the main cause of floods in the region. The rain fed rivulets and streams pose much bigger threat to its surroundings in rainy season as compared to bigger rivers due to lesser water carrying capacity and tendency to breach the banks.
 2. In September 2014, the northern region of India experienced unprecedented torrential monsoon rains causing major flooding in rivers and mainland. It triggered massive landslides, washing away of bridges, roads, buildings and irrigation canals etc. The continuous spell of rains from September 2nd to 6th, 2014, caused Jhelum, Chenab and Tawi Rivers as well as many other streams/tributaries to flow much above the danger mark. The Jammu district received 467.3mm of rainfall in Sept 2014, which exceeds normal by 339%. Similarly Rajouri District received 487.5mm of rainfall which is 386% in excess of the normal (source-Indian Meteorological department website). The Indian Meteorological Department (IMD) records precipitation above 244.4 mm as extremely heavy rainfall, and J&K received 558mm of rain in the June- September period, as against the normal 477.4 mm.
 3. A Joint team led by the Department of Economic Affairs (DEA), GoI, with representation from the World Bank visited J&K on October 21, 2014. Subsequently, GoI has sent a request to the World Bank on January 5, 2015 to field a Joint Rapid Damage and Needs Assessment (RDNA) Mission within the Union Territory of J&K. In response, a mission of the World Bank visited the Union Territory of J&K during February 1-6, 2015 in order to produce a rapid multi-sectoral assessment report of the damages and needs. The RDNA estimates the total damages and loss caused by floods at about INR 211,975 million (US\$ 3,550.45), most of it to housing, livelihoods, and roads and bridges, which combined represented more than 70% of the damages in terms of value. Public service infrastructure and equipment of hospitals and education centres were also severely damaged and are still not fully operational.
 4. Based on the RDNA results, restoration works underway, and discussions with the GoJ&K, the project will focus on restoring critical infrastructure using international best practices on resilient infrastructure. Given the Union Territory of J&K's vulnerability to both floods and earthquakes, the infrastructure will be designed with upgraded resilient features, and will include contingency planning for future disaster events. Therefore, the project aims at both restoring essential services disrupted by the floods and improving the design standard and
-

practices in the Union Territory of J&K to increase resilience.

The project is comprised of the following seven components:

- i. Reconstruction and strengthening of critical infrastructure (US\$60 million)
- ii. Reconstruction of roads and bridges (US\$80 million)
- iii. Restoration of urban flood management infrastructure (US\$50 million)
- iv. Strengthening and restoration of livelihoods (US\$15 million)
- v. Strengthening disaster risk management capacity (US\$25 million)
- vi. Contingent Emergency Response (US\$0 million)
- vii. Implementation Support (US\$20 million)

1.1 Project Development Objective

5. The project development objective is to support the recovery and increase disaster resilience in project areas, and increase the capacity of the Project Implementing Entity to respond promptly and effectively to an eligible crisis or emergency. The primary beneficiaries would be the communities in the districts that were affected by loss of public service infrastructure that will be restored and improved under the project. By strengthening disaster risk management systems and institutions, the project will benefit the entire affected region.

1.1 Subproject Background

6. Under the Component-1 of the Jhelum-Tawi Flood Recovery Project (JTFRP) which envisages reconstruction and strengthening of critical infrastructure severely affected by the floods in September- 2014, viz. School Buildings, Hospitals, Fire Stations and other important public assets, the School Education Department has proposed inclusion of **165 Nos.** schools in Jammu and Kashmir divisions in the above programme, of which **74 Nos.** school complexes are located in Jammu division. The scope of the work broadly includes restoration of partially damaged structures and reconstruction of fully damaged structures together with the restoration of equipment and furniture in the school complexes comprising primary, middle and higher secondary schools. The proposal includes construction of 2-Rooms, 3-Rooms, 4-Rooms and 6-Rooms buildings with tentative areas of 1000 sqft, 1500 sqft, 2000 sqft and 3000 sqft respectively.

1.2 Sub-Project Description:

7. The Govt. Middle School, Thichka is situated 16 Kms North-West of Sunderbani town in Thichka village. The village is accessible from Bajabain to Thichka road (7 Km milestone) by an 8 km fair-weather link passing over and along the Thichka Nalah. The Bajabain to Thichka road branches off Jammu-Poonch highway. The school is located in the Block Sunderbani in Rajouri district (74.4738155 o E," 33.0916847, o N). Thichka village is located on the West of Sunderbani Town. The Thichka village, despite its close proximity to Sunderbani town, remains under developed
-

mainly due to absence of an all-weather link road. The inhabitants are left marooned on the village frequently during the monsoon season due to severe flash floods in the Nallahs without access to basic facilities like dispensary, community services, high school education, etc.

8. The school complex with 225 nos. of students comprises of two single-storey blocks each having a front verandah. Out of the these blocks, one block having two number classrooms and one utility room has been found abandoned in a critically damaged condition in the shape of crumbling RCC ceilings with exposed and corroded steel reinforcements, cracked walls with decayed plaster and eroded flooring, as a result of severe leakage and seepage during continuous rains. The school has one toilet block comprises 2 nos. WCs. The rooms have electrical fittings / fans. Water supply from PHE Deptt. is not available. There exists no proper method of disposal of solid wastes in the school as well as the surrounding habitation.

 9. Construction of a new single storey structure comprising two classrooms (size-7.5m x 5.6m), with veranda / corridor 2.5 m wide in the middle and ramp, Proposed plinth levels safely above HFL (0.75 m above ground level). Construction of a sump tank for Rainwater Harvesting. Installation of Hand pump (with electrical submersible pump) for water supply.

1.3 Objective of the Environmental and Social Screening

10. Environmental and Social screening procedure aims to provide project developers with a set of tools and guidelines that enables to identify and manage environmental and social risks that could be associated with a proposed project. The aspect of screening focuses on the possible environmental and social costs of development and may highlight the need for environmental/social review and management. As a consequence, the outcome of the screening process leads to an enhanced environmental and social sustainability of a proposed project.
11. The Jhelum and Tawi Flood Recovery Project has been undertaken with the prime objective of a long term and disaster resilient redevelopment in project areas of J&K Union Territory of J&K with diverse and ecologically sensitive topography. The screening process, therefore, will help to quickly identify those projects where no potential environmental and social issues exist, so that only those with potential environmental and social implications will undergo a more detailed and rigorous screening and thus will support design and implementation of the quality projects in a timely manner.

2 Environmental and Social Impacts

12. The proposed reconstruction at Govt. Middle School, Thichka, Sunderbani is of extremely low magnitude involving low scale construction activities. Therefore, prima facie no environmental impact of significant or irreversible nature appears to occur. If there are any environmental impacts during the period of construction of school, these shall be insignificant, temporary, and limited to the confines of the school complex and its immediate surroundings. The impacts of such nature would be mitigated suitably by adopting appropriate construction practices and management during the execution of the sub-project. Utmost attention will be given to the development of the sound Environmental Management Plan which will provide specific actions deemed necessary to assist in mitigating the environmental impacts, guide the environmentally-sound execution of the sub-project, and ensure efficient lines of communication between the implementing agency, project management unit and contractors. The EMP shall be included in the bid document as a mandatory contractual clause and will be reviewed periodically to ensure environmentally sound execution of the proposed sub-project.
13. Although the proposed site has forest areas within 1 km, yet no significant impacts are deemed during the execution of the construction. There are also no constraints either on account of environmental sensitivity of areas like wildlife areas, areas with threatened or endangered endemic species etc. due to nonexistence of such areas around the project site.

3 Social Issues:

3.1 Issue of Land Acquisition

14. The sub-project does not involve land acquisition. The sub-project is being proposed inside the existing school premises. However, as per revenue record the existing school is on the khasra number 306/1, which is private land under the ownership of Mr. Hussain Mohammad and others (Appendix B). Total land under the private ownership is 02 kanal¹ i.e. 1011.79 sqm. The existing school, therefore, was constructed and functional on the private ownership as per revenue record.
15. During public meeting it comes out that land owner does not live in the village and has migrated from village after partition of India. Nobody from village knows about his whereabouts (details in public consultation section). However, in case of any claim by the private party in future, the compensation and other assistance as per the applicable policy and WB guidelines shall be paid to the owner by the Project.

3.2 Issue of Livelihood

16. There is no adverse impact on the livelihood of anyone since the proposed sub-project is inside the premises of the existing school having proper boundary wall. There is no agricultural activity or anything associated with livelihood on the proposed land. Positive impacts will be

¹ Kanal is a traditional unit of land area in northern states: 01 kanal equals exactly to 5440 square feet or 505.392 square meters.

anticipated in terms of employment opportunity as many skilled, semi-skilled and un-skilled personnel will get direct and indirect employment during construction phase.

17. Therefore, based on the findings during survey, there are no adverse significant environmental as well as social impacts in sub-project area, hence, no further special study or detailed environmental impact assessment (EIA)/ Social impact assessment (SIA) needs to be undertaken.

1.4. Public Consultation

18. Discussions involving the staff, students of Govt. Middle School, Thichka, Sunderbani and inhabitants have been organized in the proposed school site on 8th August, 2018. Thereafter follow up meeting was done on 21.08.20 (Appendix D). The participants were apprised of the need of the public consultation and feedback mechanism in the development process in general and particularly in the backdrop of the sub-project of the School Education Department under JTFRP.
19. The follow-up meeting was done on 21.08.20 by PIU (R&B), Jammu. Gram Panchayat Pardhan along with others were present in the meeting. Major objective of the meeting was to share the sub-project information and to know about the whereabouts of the person whose name is mentioned in the revenue record.
20. It was conveyed by the Gram Pardhan that Mr. Hussain Mohammad has been migrated from the village after partition. He was a teacher by profession. Gram Panchayat Sarpanch and other signed a resolution for construction of school (Appendix C).
21. The photographs of public meeting are annexed as Appendix E.

Other issues discussed in the meeting

- Proposed reconstruction plan of the school, emphasizing its modern design criteria and standards with respect to disasters as per the specific objective of the project.
- Whether the proposed construction addresses the requirement of the school.
- Mandatory requirement of Environmental & Social screening and how it would benefit the communities in the long run.
- Adverse direct or indirect impacts caused due to construction activities and mitigation measures through ESMP.
- Aspect of environmental protection and conservation with respect to environmentally sensitive areas.
- Whether any loss of business/livelihood could occur in the community during course of construction.
- How public could monitor sub-project execution and submit complaints through public grievance redressal system.

Outcome and suggestions received from the Public Consultation

22. It was confirmed by the Gram Panchayat that that although the revenue record existed on the name of private person who was migrated from the village after the partition and none is aware about his whereabouts. They also confirmed that none has raised any issues of ownership and
-

compensation since the school was constructed (Appendix C).

23. The meeting evoked overwhelming response from the school staff/students as well as inhabitants who appreciated the proposed development initiative through the sub-project under JTFRP for upgradation of school infrastructure in Thichka village. The participants assured of extending their full support during the course of project implementation, and firmly believed that the long term benefits to the village far outweigh the short term impacts or inconvenience caused during the construction stage of the proposed plan.

Suggestions:

- They suggested including flood protection work along the Nallah edges to prevent erosion of adjoining land which included school complex boundary wall as well.
- It was also suggested to execute the sub-project expeditiously in view of the hardships being faced by the students due to the abandonment of the damaged 3-roomed classroom block.
- The students suggested procurement of new furniture in view of the insufficient existing furniture in the school.

1.5 Environmental and Social management Plan

A detailed Environmental and social Management Plan (ESMP) will be prepared which will provide specific actions deemed necessary to assist in mitigating the environmental and social impacts arising out of the execution of the sub-project. This will guide the environmentally-sound execution of the subproject, and ensure efficient lines of communication between the implementing agency, project management unit, and contractors. The ESMPs will form part of the bid document and to be reviewed during implementation. The ESMP will be included in the contractual clauses and will be made binding on the contracting firm.

Environment and Social Screening Part A:

General Information

Name of the Sub-Project	CONSTRUCTION OF 2-ROOM BLOCK & ALLIED INFRASTRUCTURE AT GOVT MIDDLE SCHOOL, THICHKA, DISTRICT RAJOURI.	
1. Type of proposed activity (tick the applicable option and provide details)		
• Road		-
• Bridge		-
• Fire Station		-
• Hospital/Health Facility		-
• Educational Institute		MIDDLE SCHOOL
• Building for Livelihoods		-
• Flood Infrastructure Related		-
• Other Public Building		-
• Any Other (Please Specify)		-
2. Location of the proposed sub-project		
• Name of the Region	JAMMU & KASHMIR	
• Name of the District	RAJOURI	
• Name of the Block	SUNDERBANI	
• Name of the Settlement	THICHKA	
• Latitude	33.0916847, ° N	
• Longitude	74.4738155 ° E	

3a. Proposed Nature of Work (tick the applicable options)	
• Minor Repairs	-
• Major Repairs/Rehabilitation	
• Upgrading/Major Improvement	-
• Expansion of the facility	-
• New Construction	√
• Any Other	-
3b. Size of the sub-project (approx. area in sq. mt/hac or length in mt/km, as relevant)	426 sq. mts
4. Land Requirement (in hac./sq.mt.)	
• Total Requirement	426 sqm
• Private Land	426 sqm
• Govt. Land	Nil
• Forest Land	Nil
5. Implementing Agency Details (sub-project level)	
• Name of the Department/Agency	PIU - R&B Department, Const. Div.- Nowshera
• Name of the contact person	S.M. PERVAIZ
• Designation	EXECUTIVE ENGINEER
• Contact Number	9419136296
• E-mail Id	
6. Screening Exercise Details	
• Date on which it was carried out	22-12- 2018
• Name of the Person	Vikash Sharma/ Charanjeet Singh

• Contact Number	+919419125803, +91 9419893392
• E-mail Id	sharmasociologist@gmail.com , jcharan.sim@gmail.com

Question	Yes	No	Details
1. Is the sub-project located in whole or part within 1 km of the following environmentally sensitive areas?			
a. Biosphere Reserve		No	-

Part B (1): Environment Screening

b. National Park		No	
c. Wildlife/Bird Sanctuary		No	-
d. Wildlife/Bird Reserve		No	-
e. Important Bird Areas (IBAs)		No	-
f. Habitat of migratory birds (outside protected areas)		No	-
g. Breeding/Foraging/Migratory route of Wild Animals (outside protected areas)		No	-
h. Area with threatened/rare/ endangered fauna (outside protected areas)		No	-
i. Area with threatened/rare/ endangered flora (outside protected areas)		No	-
j. Reserved/Protected Forest		No	-

k. Other category of Forest	Yes		Distance 1km approx.
l. Wetland		No	-
m. Natural Lakes		No	-
n. Rivers/Streams	Yes		Site located adjoining Thichka Nallah which is a seasonal nallah.
o. Swamps/Mudflats		No	-
p. Zoological Park		No	-
q. Botanical Garden		No	
2. Is the sub-project located in whole or part within 500 mts. of any of the following sensitive features?			
a. World Heritage Sites		No	-
b. Archaeological monuments/ sites (under ASI's central/state list)		No	-
c. Historic Places/Monuments / Buildings/Other Assets (not listed under ASI list but considered locally important or carry a sentimental value)		No	-
d. Religious Places (regionally or locally important)		No	-
e. Reservoirs/Dams		No	-
f. Canals		No	-

g. Public Water Supply Areas from Rivers/Surface Water Bodies/ Ground Water Sources		No	
3. What is the High Flood Level in the sub-project area?	0.75 m above ground level		
4. Is any scheduled/protected tree like Chinar, Mulberry or Deodar likely to be affected/ cut due to the project?		No	
5. Is the sub-project located in a landslide/heavy erosion prone area or affected by such a problem?		No	
6. Is sub-project located in an area that faces water paucity or water quality issues?		No	

Part B (2): Result/Outcome of Environmental Screening Exercise

1.	Environment Impact Assessment Required	No
2.	Environment Clearance Required	No
3.	Forest land Clearance/Diversion Required	No
4.	Tree Cutting Permission Required	No
5.	ASI (Centre/State) Permission Required	No

6.	Permission from ULB/Local Body/Department Required	Yes
7.	Any other clearance/permission required	No

Part C (1): Social Screening

1. Does the sub-project activity require acquisition of land?			
Yes		No	√
Give the following details:	Private Land (sqmts/hac.)		426 sqm
	Govt. Land (sqmts/hac.)		-
	Forest Land (sqmts/hac.)		-
2. Does the proposed sub-project activity result in demolition/removal of existing structures?			
Yes			-
If so, give the following details:			
• Number of public structures/buildings		NIL	
• Number of common property resources (such as religious/cultural/ drinking water/wells/etc.)		NIL	
• Number of private structures (located on private or public land)		NIL	
3. Does the proposed project activity result in loss of crops/trees?			
		No	

4. Does the proposed Project activity result in loss of direct livelihood/ employment?			
		No	
5. Does the proposed activity result in loss of community forest/pastures on which nearby residents/local population are dependent?			
		No	
If yes, give the details of the extent of area to be lost (in acres/hac).		-	
6. Does the proposed Project activity affect scheduled tribe/caste communities?			
		No	

Part C (2): Result/Outcome of Social Screening Exercise

S.No.	Result/Outcome	Outcome
1.	Answer to all the questions is 'No'	No SIA/RAP required
2.	Answer to any question is 'Yes' and the sub-project does not affect more than 200 people (i.e. either complete or partial loss of assets and/or livelihood)	Nil
3.	Answer to any question is 'Yes' and the sub-project affects more than 200 people (i.e. either complete or partial loss of assets and/or livelihood)	NIL

Outcome of Screening:

24. The proposed sub-project will not have any significant environmental & social impact because the project will not involve diversion of forest land, destruction of ecological resources, displacement of people, any acquisition of land, demolition or removal of structures, loss of crops /trees, loss of employment / livelihood and does not affect any tribal/caste communities; hence no EIA/SIA/RAP is required.

Resolution by Gram Panchayat during public consultation

On 21st August, 2020, a public meeting was organized at Govt Girls Middle School Thichka by PIU PWD (R&B), Jammu.

The objective of the meeting was to consult the Gram Panchayat, School teachers and other senior citizens/ people of the village and to verify and discuss with Gram Panchayat the details provided in the revenue record.

The public meeting was chaired by Gram Panchayat Sarpanch Shri. Sh. Roshan Lal Sharma. The following information was shared by the Sarpanch and others present in the meeting.

It was disclosed by PIU to the Gram Panchayat and other people present in the meeting that this school building is being proposed on the land under khasra number 306/1 at Govt. Middle School in your village Thichka and the title of the land stand on the name of Hussain Mohd. and others. That the school was constructed in the year 1961.

1. They confirmed that they are very much aware that title of the land stand on the name of one Mr. Hussain Mohd.
2. They also confirmed that this person and his family was migrated from the village and nobody is aware about their whereabouts. He was a teacher and before migrating, he requested the villagers to open a school on this piece of land which was his home.
3. No claim of ownership and compensation received by the school till today for this piece of land under Khasra number 306/1.
4. School is fully operational since then and now a total of 66 Students are studying. This school has permanent boundary wall with proper gate and there is no encroachment by anyone.

This resolution is being unanimously passed by the Sarpanch and other senior and eminent people of the village in the presence of the officer from the PIU PWD (R&B) Division, Nowshera on 21.08.2020. We also confirm once again that there is no claim of ownership or compensation on this piece of land since 1961 and is in peaceful possession of School Education

Department. Gram Panchayat is fully in support of the sub-project and on behalf of the village/community Sarpanch Shri.....Roshan Lal Sharma assured full cooperation for its construction.

Consultation with Sarpanch

**Consultation with Sarpanch
Jhelum Tawi Flood Recovery Project**

Date: 21-08-2020 Place: GMS Thichka

Name of Subproject: Construction of 02 Nos of Class Room at GMS Thichka

Name of the PIU: PWD (R&B) Dept. Jammu.

Name of the Sarpanch: Sh. Rashal Lal Sharma Age 65 Gender M

Address of the Sarpanch: J/o Kangri Tehsil Beripattan, Distt. Rayouri.

- Do you know that Government of J&K Kashmir under "Jhelum Tawi Flood Recovery Project" proposed to construct a school building in the already existing school?
Yes/No Yes
- What is the current usage of the land? School Building
- When this school was constructed? Since then any claim raised by anyone for ownership or compensation for this piece of land?
No
- Is anybody's livelihood dependent on the land required for constructing school building?
Yes/No No
- Do you have any objection if PIU through PMU (JFRP) under World Bank funding constructs a school building on the land in the existing school?
Yes/No No

Name of Sarpanch: Rashal Lal Sharma, Name of Officer from PIU: Vireet Kaila
