## EXECUTIVE SUMMARY

The devastating floods of September 2014, shows negative impact on the socio-economic aspects of the Union Territory (erstwhile State) and massive infrastructure damaged in Kashmir division. In response, a mission of the World Bank visited the Union Territory (erstwhile State) during February 1-6, 2015 in order to produce a rapid multi-sectoral assessment report of the damages and needs. The RDNA estimates the total damages and loss caused by floods at about INR 211,975 million (US\$ 3,550.45), most of it to housing, livelihoods, and roads and bridges, which combined represented more than 70% of the damages in terms of value. Public service infrastructure and equipment of hospitals and education centers were also severely damaged and are still not fully operational.

Based on the RDNA results and discussions with the GOJ&K, the “Jhelum and Tawi Flood Disaster Recovery Project (JTFRP)” will focus on restoring critical infrastructure using international best practice on resilient infrastructure. One of the sectors badly hit during the floods was education (school/college), the restorations of which have been included in the Component-1 of the World Bank investment.

Govt. Middle School Naikpora, Kulgam, J&K, is located within the coordinates of 33°38'24"N and 75°01'12"E. In 1998, the school was started in a private accommodation and thereafter in 2010 was constructed at the present location. The school was affected by the floods of 2014 due to its proximity with Vaishav stream a tributary of Jhelum River that flows 300 meters away from the school. The available infrastructure does not fulfill the requirements, therefore, the classrooms have either been partitioned or the academic activities are held in open spaces in lawn. The school lacks basic facilities like reading room, separate washrooms for girls etc. In view of above, sub-project “Construction of 02 roomed single story building with separate toilet block for boys and girls at Govt. Middle School, Naikpora, Kulgam”, Jammu and Kashmir is proposed.

Subprojects under “Jhelum and Tawi Flood Recovery Project” have a prior requirement of screening which is based on three categories; viz., nature of the project, size of the project and location of the project that is sensitive area criteria. The objective of

Environment and social screening is to identify the potentially significant environmental/ social issues of the sub-project at an early stage for detailed Environmental and Social impacts.

The proposed sub-project does not require land acquisition since it's proposed inside the existing school complex having proper boundary wall and fencing. The revenue record revealed that land is 'Shamilat Deh'<sup>1</sup> and is being cultivated by some people. A total of 307 kanal and 14 Marlas i.e. 384.16 acre is under khasra number 1511. However, note put up in the revenue record, confirmed that out of total land school exists on 3 kanal i.e. 0.374656 acre land.

Public consultations conducted during screening exercise in the sub-project areas on 01.10.2018 and thereafter on 10.10.2020. Different stakeholders of the sub-project such as teachers, students, villagers, Lambardar and others were informed about the proposed sub-project and their views were obtained. Since the land as per revenue record is 'Shamilat Deh' i.e. common village land, therefore, Gram Panchayat supposed to be approached. However, it was conveyed by the people of the village that it is non-functional. Therefore, community resolution containing consent of people and Lambardar (Nambardar)<sup>2</sup> was obtained for the use of community land on 10.10.2020. During consultation also, the people of the village reiterated that the Panchayat is not functional, therefore, community resolution or any document provided by the Lambardar, under his seal and signature, are acceptable to community and they have no objection to the sub-project.

The screening study reveals that there are no likely significant social or environmental impacts of the proposed sub-project. The sub-project is proposed inside the existing

---

<sup>1</sup> Common or village land.

<sup>2</sup> In revenue terminology, it means Village Headman. As per J&K Lambardai Act 1980: A person shall not be qualified to be elected or appointed as Lambardar, if the person is under 30 years of age; is an employee of the government or local body; is not tilling the land; is of unsound mind, is a person who has been convicted of any offence, is of bad character involving moral turpitude. Lambardar can be elected, appointed and nominated depends upon the circumstances. Major duties of Lambardar: A Lambardar shall report to the Tehsildar about all the encroachments on common lands including roads, grazing grounds or government lands and damage to the Government property such as electric transmission lines etc; assist in such a manner as the revenue officer, may from time to time direct in crop inspection, mutation proceedings, survey, preparation of records or other revenue department business within the limits of constituency; report to the Tehsildar or any concerned officer about any extra-ordinary event of public importance.

school complex and it does not trigger any involuntary resettlement since no asset needs to be acquired. Hence, no further studies such as SIA or EIA needs to be done.

## **1.0. Introduction**

### **1.1 Project Background**

In September 2014, J&K experienced torrential monsoon rains in the region causing major flooding and landslides. The continuous spell of rains from September 2-6, 2014, caused Jhelum and Chenab Rivers as well as many other streams/tributaries to flow above the danger mark. The Jhelum River also breached its banks flooding many low-lying areas in Kashmir, including the capital. In many districts, the rainfall exceeded the normal by over 600%. Due to the unprecedented heavy rainfall the catchment areas particularly the low lying areas were flooded for more than two weeks. Some areas in Kashmir and in urban Srinagar and Anantnag stayed flooded for 28 days. Water levels were as high as 27 feet in many parts of Srinagar.

Based on the **Rapid Damage Needs Assessment (RDNA)** results, restoration works underway, and discussions with the GoJ&K, the project will focus on restoring critical infrastructure using international best practice on resilient infrastructure. Given the U.T.'s vulnerability to both floods and earthquakes, the infrastructure will be designed with upgraded resilient features, and will include contingency planning for future disaster events. Therefore, the project aims at both restoring essential services disrupted by the floods and improving the design standard and practices in the Union Territory (erstwhile State) to increase resilience.

### **1.2 Project Development Objective**

The Project Development Objective (PDO) is to support the recovery and increase disaster resilience in targeted areas of the Union Territory (erstwhile State), and increase the capacity of the entities of the U.T. to respond promptly and effectively to an eligible crisis or emergency.

The project is comprised of the following seven components:

- I. Reconstruction and strengthening of critical infrastructure (US\$60 million)
- II. Reconstruction of roads and bridges (US\$80 million)

- III. Restoration of urban flood management infrastructure (US\$50 million)
- IV. Strengthening and restoration of livelihoods (US\$15 million)
- V. Strengthening disaster risk management capacity (US\$25 million)
- VI. Contingent Emergency Response (US\$0 million)
- VII. Implementation Support (US\$20 million)

### **1.3 Sub-project Background**

The objective of this component of the “Jhelum and Tawi Flood Recovery Project” is to support the reconstruction/restoration of damaged public buildings, such as schools, higher education buildings, hospitals, fire stations, and selected block and district offices, and other important public buildings. It will include the restoration of partially damaged structures and the reconstruction of fully damaged structures, including equipment and furniture. The component will finance infrastructure and equipment damaged by the disaster, and improvements to current structures to increase resilience. Assessments will be carried out to determine the extent of structural integrity and retrofitting/reconstruction needs. For colleges/schools, the reconstruction will be focused on replacement of damaged buildings. The component will also finance the repair and reconstruction of damaged hospitals, higher education, fire station, and other public buildings, including the procurement of equipment/furniture, etc.

### **1.4 Sub-project Description**

Govt. Middle School, Naikpora, Kulgam was started in rented accommodation in the year 1998 and in 2010 constructed at the present location. It is located in urban area of Kulgam, Block-Kulgam about 1km from urban and administrative hub. The school is Co-educational and houses both boys and girls Middle schools with total roll of more than 80 students. Naikpora is also famous for the zyarat / tomb of Sufi saint Syed Hassan Simnani which is located 01km away from sub-project site.

The proposed sub project “Construction Of 02 roomed class room block with separate toilet facility for boys and girls at Govt. middle school, Naikpora Kulgam ” is funded by World Bank. The Project Implementation Unit (PIU) for this sub-project will be Public Works (R&B) Department, (Kashmir) Govt. of Jammu & Kashmir.

The classroom block will accommodate 02 classrooms. Besides, separate washrooms

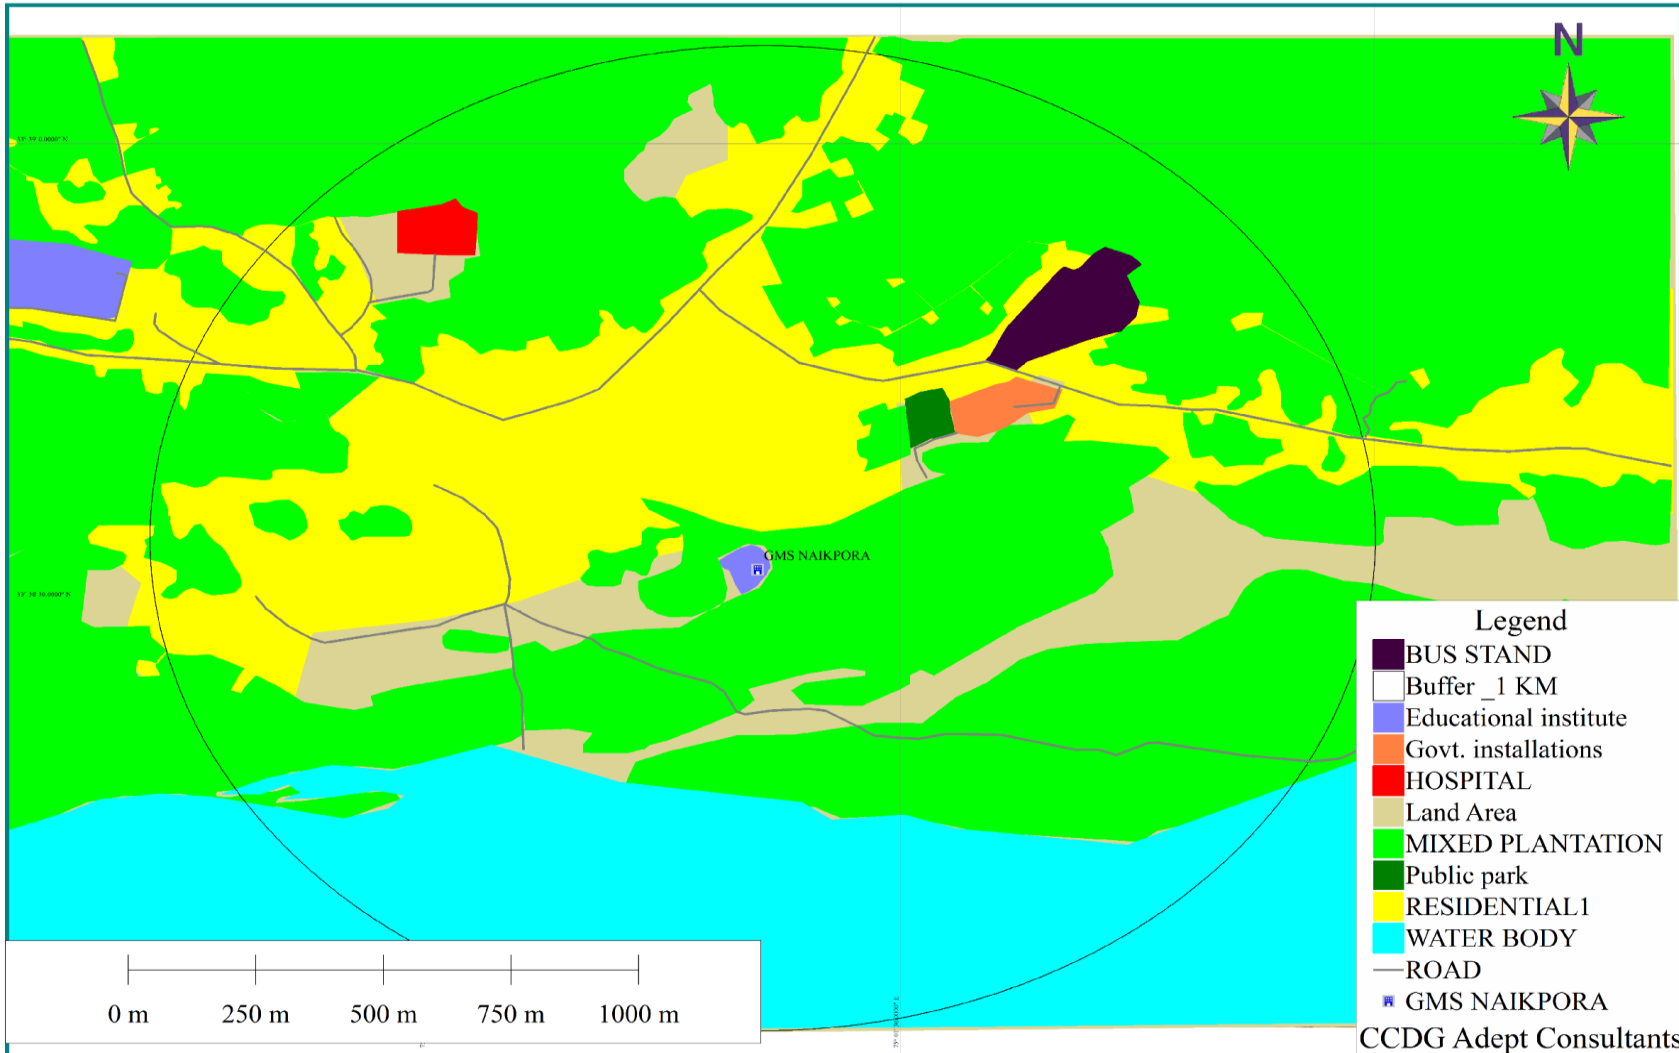

blocks will be constructed for student's convenience with multiple cubicles. The execution of this sub-project will result in effective academic activities. The design of these blocks has taken into consideration the seismicity of the region and other factors. Planning principles and design considerations have also been reviewed and incorporated into the site planning process whenever possible. The building shall rest on RCC Raft / Pile foundation with plinth beams as per design. RCC Frame structure has been proposed with non-load bearing panels of bricks/ hollow block( 110 mm brick work and 200 mm hollow block) masonry in cement for the building. RCC slab shall be laid over and shall be provided with steel roof truss with colour coated CGI sheets in accordance with structural design. Wooden frames of designed section shall be provided for doors, /Windows and glazed/panelled shutters wood or equivalent shall be provided in accordance with the approved architectural design. The wood work shall be painted / polished with paint of approved quality. The floor shall be of Kota/Terrazzo/ Vitrified Tiles/ Granite as per the norms freezed in CPWD cost index. All other areas including ceiling shall be cement plastered and finished with POP and emulsion paint of approved shade. The toilets shall be provided with concealed sanitary and plumbing pipes/fittings with the requisite fixtures, chinaware etc. in accordance with the approved specifications.

# Lay out plan

# Environmental Screening Of GMS NAIKPORA

## **1.5 Objective of the Environmental and Social Screening**

Subprojects under “Jhelum and Tawi Flood Recovery Project” commonly known as JTFRP have a prior requirement of screening which is based on three categories; viz., nature of the project, size of the project and location of the project that is sensitive area criteria. Based on this assessment, sub-projects with potentially significant environmental/ social issues are identified at an early stage for detailed Environmental/ Social impacts. Evaluate all the available information on environmental and social aspects as provided in the ESDS and assess, based on the level of expected environmental and social impacts including any field visits, whether the proposed subproject is classified in different categories as per World Bank guidelines.

## **1.6 Methodology of Environment and Social Screening Study**

The environment and social screening for the subproject has been carried out at the site by making use of a Environment and Social Screening Checklist (Appendix–A) that contains the relevant questions for identification of anticipated environment and social impacts due to execution of the subproject.

## **2.0. Environmental and Social Findings**

### **2.1 Environmental Issues**

The project is not anticipated to have adverse significant or irreversible negative environmental impacts neither at the construction, nor at operation phase. Impacts of the construction phase will be typical for all medium scale construction activities, short-term/ temporary and limited to the project site. The sub-project shall be executed by demolition of the remains of existing structure declared unsafe. No Impacts small, medium or large scale shall be encountered during the operation phase as the same comprises of academic activity only. There are no sensitive areas like specially protected areas or threatened or endangered endemic species in the project area.

## **2.2 Social Issues**

### **2.2.1 Issue of Land Acquisition**

The proposed sub-project does not require land acquisition since it's proposed inside the existing school complex having proper boundary wall and fencing. However, revenue record revealed that land is 'Shamilat Deh'<sup>3</sup> and is being cultivated by some people (Appendix B). A total of 307 kanal and 14 Marlas i.e. 384.16 acre is under khasra number 1511. However, note put up in the revenue record, confirmed that out of total land school exists on 3 kanal i.e. 0.374656 acre land. The rest of land is under different usages such as residential, commercial offices, cultivation and playgrounds etc. The sub-project under JTFRP is proposed inside the existing school which was constructed over the Shamilat Deh land in the year 2010. The Gram Panchayat was approached since the land as per revenue record is 'Shamilat Deh' i.e. common village land. However, it was conveyed by community and others that it's non-functional. On 10.10.2020, a community resolution containing consent of people and Lambardar (Nambardar)<sup>4</sup> was passed during the consultation for the use of community land. During consultation also, the community reiterated that the Panchayat is not functional, therefore, community resolution or any document provided by the Lambardar, under his seal and signature, are acceptable to them and community has no objection to the sub-project. The community resolution along with the signatures of the participants is attached as Annexure D.

### **2.2.2 Issue of Livelihood**

The screening exercise envisaged that the proposed sub-project will not have adverse impact on the livelihood of anyone. Positive impacts anticipated in terms of employment

---

<sup>3</sup> Common or village land.

<sup>4</sup> In revenue terminology, it means Village Headman. As per J&K Lambardai Act 1980: A person shall not be qualified to be elected or appointed as Lambardar, if the person is under 30 years of age; is an employee of the government or local body; is not tilling the land; is of unsound mind, is a person who has been convicted of any offence, is of bad character involving moral turpitude. Lambardar can be elected, appointed and nominated depends upon the circumstances. Major duties of Lambardar: A Lambardar shall report to the Tehsildar about all the encroachments on common lands including roads, grazing grounds or government lands and damage to the Government property such as electric transmission lines etc; assist in such a manner as the revenue officer, may from time to time direct in crop inspection mutation proceedings, survey, preparation of records or other revenue department business within the limits of constituency; report to the Tehsildar or any concerned officer about any extra-ordinary event of public importance.

opportunities as many skilled, semi-skilled and un-skilled personnel will get direct and indirect employment during construction phase.

### **2.2.3 Environmental and social Management Plan (ESMP)**

A detailed Environmental and social Management Plan (ESMP) will be prepared and implemented. It will provide specific actions deemed necessary in mitigating the adverse social and environmental impacts. It will guide socially and environmentally sound execution of the subproject and ensure efficient lines of communication between the implementing agency, project management unit, and the contractors. The ESMPs will form part of the bid document and to be reviewed during implementation. The ESMP will be included in the contractual clauses and will be made binding on the contracting firm.

## **3.0. Public Consultation**

In compliance with the ESMF, meaningful public consultations were undertaken during the site visits in the sub- project areas. Public consultations were conducted during the site visits in the sub-project areas on 01.10.2018 and thereafter on 10.10.2020. Stakeholders (teachers, students, Lambardar and people who are directly or indirectly involved with the sub-project) were informed about the proposed activities and their views were obtained (Appendix-D).

During consultation on October 10, 2020, villagers in the presence of Lambardar confirmed that they are aware that school building under JTFRP is proposed upon the 'Shamilat Deh' land. They also substantiated that existing school complex inside which the sub-project under JTFRP is proposed was constructed in 2010 and since then there is no claim for the land. In the resolution, they also confirmed that there is no agricultural activity and no private construction by anyone and land is free of encumbrance (the community resolution passed by the Lambardar/community is attached as Appendix-D). During consultation, the community reiterated that the Panchayat is not functional and therefore, the community resolution provided by the Lambardar, under his seal and signature, is acceptable to them and people have no objection for the use of Community land for the school building.

## **Issues discussed**

- Need of the subproject, current facilities and proposal for sub project.
- Project and its source of assistance.
- Unanticipated impacts during construction.
- Environment and Social Screening Report.
- Environmental and Social Policy of World Bank.
- Protection and conservation aspects of environmental attributes.
- Use of community land for the sub-project and objection if any from the community will be considered by the project and will be further discussed.
- Grievance Redressal Mechanism for the sub-project.

## **Outcome and suggestions**

The following suggestions were received:

- Proper barricading of construction site during construction phase so that any untoward incident can be avoided in the school premises.
- That mitigation measures should be effective during construction phase.
- People have no objection for use of 'Shamilat Deh' land for the sub-project.
- That those activities which cause major disturbances should be executed before and after school timing so that academic activity should not be affected.

PW (R&B) department as PIU/ implementing agency ensured that the requisite environmental mitigation measures shall be incorporated in ESMP and public consultation shall be a regular process during all stages of the sub -project to solve any issues arising out of the proposed works.

Therefore, based on the findings during screening exercise, there are no adverse significant environmental as well as social impacts in sub-project area, hence no further special study or detailed environmental impact assessment (EIA)/ Social impact assessment (SIA) needs to be undertaken.

## Appendix-A: Environment and Social Screening

### Part A: General Information

<b>Name of the sub-project</b>	Construction of 02 Room Single Story Building with Separate Toilet Block for Girls at Govt. Middle School Naikpora, Kulgam	
<b>2. Type of proposed activity</b> (tick the applicable option and provide details)		
▪ Road	X	
▪ Bridge	X	
▪ Fire Station	X	-
▪ Hospital/Health Facility	X	
▪ Educational Institute	✓	Govt. Middle School, Naikpora
▪ Building for Livelihoods	X	
▪ Flood Infrastructure Related	X	
▪ Other Public Building	X	
▪ Any Other (Please Specify)	X	
<b>3. Location of the proposed sub-project</b>		
▪ Name of the Region	Kashmir	
▪ Name of the District	Kulgam	
▪ Name of the Block	Kulgam	
▪ Name of the Settlement	Naikpora	
▪ Latitude	33°39'00"N	
▪ Longitude	75°01'30"E

▪ E-mail Id	rafiq.kaiser@yahoo.com

**Part B (1): Environment Screening**

Question	Yes	No	Details
<b>1. Is the sub-project located in whole or part within 1 km of the following environmentally sensitive areas?</b>			
a. Biosphere Reserve		No	
b. National Park		No	
c. Wildlife/Bird Sanctuary		No	
d. Wildlife/Bird Reserve		No	
e. Important Bird Areas (IBAs)		No	
f. Habitat of migratory birds (outside protected areas)		No	
g. Breeding/Foraging/Migratory route of Wild Animals (outside protected areas)		No	
h. Area with threatened/rare/ endangered fauna (outside protected areas)		No	
i. Area with threatened/rare/ endangered flora (outside protected areas)		No	
j. Reserved/Protected Forest		No	
k. Other category of Forest		No	
l. Wetland		No	
m. Natural Lakes		No	

n. Rivers/Streams	Yes		Vaishav stream flows 500 m away from school
o. Swamps/Mudflats		No	
p. Zoological Park		No	
q. Botanical Garden		No	
<b>4. Is the sub-project located in whole or part within 500 mts. of any of the following sensitive features?</b>			
a. World Heritage Sites		No	
b. Archaeological monuments/sites (under ASI's central/state list)		No	
c. Historic Places/Monuments/Buildings/Other Assets (not listed under ASI list but considered locally important or carry a sentimental value)		No	
d. Religious Places (regionally or locally important)		No	
e. Reservoirs/Dams		No	
f. Canals		No	
g. Public Water Supply Areas from Rivers/Surface Water Bodies/Ground Water Sources		No	
4. What is the High Flood Level in the sub-project area?	34.70 Guage in feets,115218 cusec discharge at Sangam		
5. Is any scheduled/protected tree like Chinar, Mulberry or Deodar likely to be affected/cut due to the project?		No	

6. Is the sub-project located in a landslide/heavy erosion prone area or affected by such a problem?		No	
7. Is sub-project located in an area that faces water paucity or water quality issues?		No	

<b>Part B (2) : Result/Outcome of Environmental Screening Exercise</b>		
1.	Environment Impact Assessment Required	No
2.	Environment Clearance Required	No
3.	Forest land Clearance/Diversion Required	No
4.	Tree Cutting Permission Required	No
5.	ASI (Centre/State) Permission Required	No
6.	Permission from ULB/Local Body/Department Required	Yes Permission for building construction will be required from Town Area Committee
7.	Any other clearance/permission required	Yes Various Statutory clearances and NOC's / PUC's for establishment or operation of stone crushers, generators, vehicles etc shall be required to be obtained by the Contractor from the concerned authorities. Construction material will be procured only from permitted sites and licensed /authorized quarries/ borrow sites.

## Part C (1): Social Screening

<b>1. Does the sub-project activity require acquisition of land?</b>			
Yes		No	√
Give the following details	Private Land (sq mts/hac.)		No
	Govt. Land (sq mts/hac.)		No
	Forest Land (sq mts/hac.)		No
	Community land (Shamilat Deh)		231 m <sup>2</sup>
<b>2. Does the proposed sub-project activity result in demolition/removal of existing structures?</b>			
Yes		No	✓
If so, give the following details:			
▪ Number of public structures/buildings		NIL	
▪ Number of common property resources (such as religious/cultural/ drinking water/wells/etc.)		-	
▪ Number of private structures (located on private or public land)		-	
<b>3. Does the proposed project activity result in loss of crops/trees?</b>			
Yes		No	✓
<b>4. Does the proposed Project activity result in loss of direct livelihood/ employment?</b>			
Yes		No	✓

<b>5. Does the proposed activity result in loss of community forest/pastures on which nearby residents/local population are dependent?</b>			
Yes		No	✓
If yes, give the details of the extent of area to be lost (in acres/hac).			
<b>6. Does the proposed Project activity affect scheduled tribe/caste communities?</b>			
Yes		No	✓

### Part C (2): Result/Outcome of Social Screening Exercise

S.No.	Result/Outcome	Outcome
1.	Answer to all the questions is 'No' and only forest land is being acquired	NA
2.	Answer to any question is 'Yes' and the sub-project does not affect more than 200 people (i.e. either complete or partial loss of assets and/or livelihood)	No
3.	Answer to any question is 'Yes' and the sub-project affects more than 200 people ( <i>i.e. either complete or partial loss of assets and/or livelihood</i> )	No

### Outcome

The sub-project requires use of community land which is already under the peaceful possession of school as per revenue record. However, for usage of community land, community resolution signed by the Lambardar and the community has been obtained. They (community) have no objection for using community land by PIU for the sub-project.

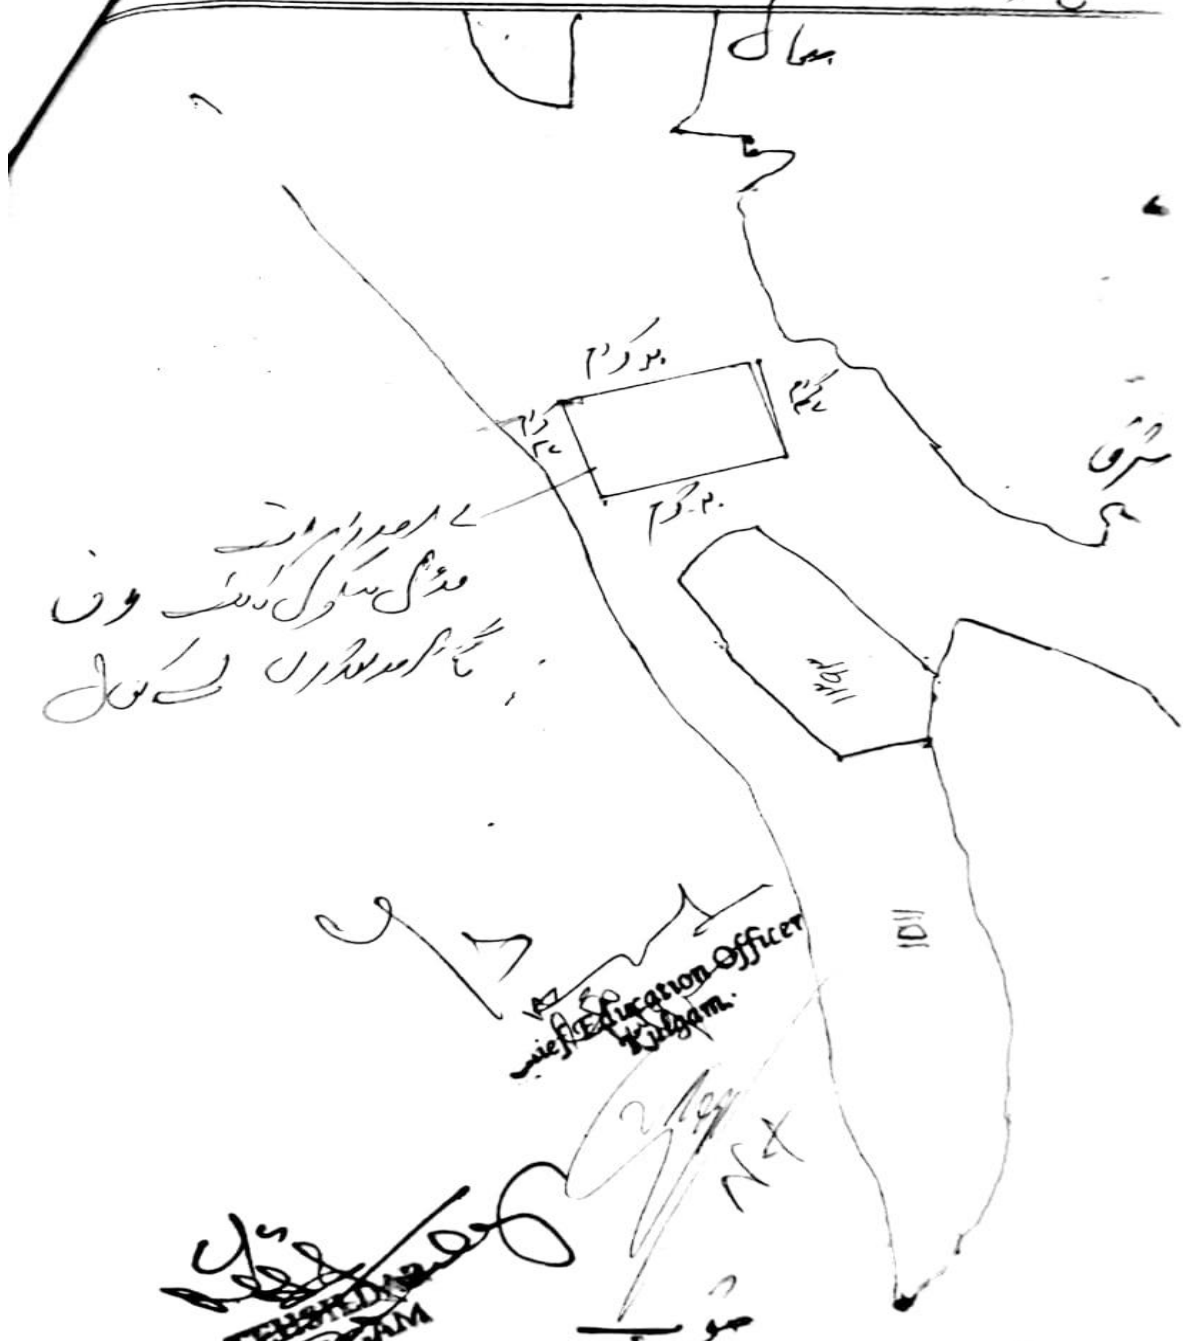

The proposed sub-project will not have any significant environmental & social impact. There may be some short term inconvenience to Staff, students and local citizens due to construction but it will be for very short period if comparing with the

long term benefits to the public. To address the same, ESMP will be implemented during construction.

No EIA and SIA studies are required for the subproject site. However, the subproject would require preparation of ESMP. Only statutory clearances and NOC's / PUC's for establishment/operation of batching plant, stone crushers, generators, vehicles etc. shall be required to be obtained by the contractor.

## Appendix D: Community Resolution (10.10.2020)

### Community Resolution

A meeting is organized today i.e. on 10-10-2020 by the villagers/community of the village Naikpora of tehsil Kulgam district Kulgam of J&K, where a school building under sub-project "Construction of 2 roomed classroom block along with separate toilet Block for Boys & Girls at Govt. middle school Naikpora", (Kulgam) J&K is proposed. This is proposed under JTFRP (World Bank funded). The objective of the meeting is to deliberate on the revenue record, involvement of stakeholders and to obtain voluntary consent of people for the sub-project.

- The school building is proposed upon the Shamilat Deh (Common/Village Land) Category of land under Khasra number 1511-min, inside the existing school, having proper boundary wall and fenced from all side. The total land under khasra number is 307 k and 14 marlas. The school has possession of only 3 kanal of land.
- The school inside which this school building is proposed was constructed in the year 2010. Since then there is no claim for the land/compensation from any quarter.
- There is no agricultural or any other activity inside the school premises. Besides, there is no construction by any private party and land is free from encumbrance.
- People, have no objection if PIU (R&B) K construct school building proposed under JTFRP (World Bank funding).
- The Panchayat (Local body) is not functional; therefore, resolution is being signed by the Lambardar in the presence of villagers/community. We authenticate that community have no objection to the sub-project.
